

Specification

Material: both sides profiled high density polyethylene (UHMW)

Dimensions: 400 x 200 x 9,4 cm

Weight: 360 kg/panel

Color: sand (standard) other colours optional

Bearing cap.: 160/m²

Transport: 56 panels of XL-mat per 24T truck

Applications

Our XL-mat series is the ultimate extreme heavy duty road mat for safe, temporary access across soft ground and in extreme wet weather conditions. Cellular core construction provides buoyancy in water-logged areas. The surface tread patterns, including XL-mat design (patent pending), improve safety and tractions for load-bearing vehicles, ideal for vehicles with tyres, while the interlocking connection system reduces mat drift and slippage. The mats provide years of reusable performance with proper use and maintenance.

Our mats have two different profiles to improve traction

treading firmly even on the mud
